CSL1010: Introduction to Computer Science

Quiz 1, IIT Jodhpur, Instructor: Palash Das, Date: 03.09.2025

Time: 20 Minutes

Full Marks: 10 * 1

Attempt all questions. Use the back of the answer sheet for rough work and write your final answers neatly and clearly in the space provided on the question paper. Read each question carefully before attempting. **Good Luck!**

Write down the output of the following questions.

1.

```
int main () {  
    int a = 6, b = 4;  
    printf ("%d\n", a+++b);  
    return 0;  
}
```

Ans: 10

2.

```
int main() {  
    int x = 10;  
    if (x != 0)  
        printf("Zero");  
    else  
        printf("Non-zero");  
    return 0;  
}
```

Ans: Zero

3.

```
int main() {  
    int x = 0, y = 1;  
    if (x && y || !y)  
        printf("Yes");  
    else  
        printf("No");  
    return 0;  
}
```

Ans: No

4.

```
int main() {  
    int a = 5;  
    if (a > 0)  
        if (a < 10)  
            if (a == 5)  
                printf("Yes");  
            else  
                printf("No");  
    return 0;  
}
```

Ans: Yes

5.

```
int main() {  
    int a = 3, b = 4;  
    printf ("%d\n", (a & b) + (a | b) + (a ^ b));  
    return 0;  
}
```

Ans: 14

6.

```
int main() {  
    int a = 6, b = 2;  
    printf("%d\n", a >> b + 1);  
    return 0;  
}
```

Ans:

0

7.

```
int main () {  
    int a = 8, b = 3;  
    printf("%d\n", a / b * b + a % b);  
    return 0;  
}
```

Ans:

8

8. True or False (Just put T/F on the right-hand side of each line)

- a. The else in nested if-else statements without braces always pairs with the nearest unmatched if. **T**
- b. Macros defined with #define do not have a data type. **T**
- c. Integer division in C always truncates the fractional part. **T**
